

# Township of Douro-Dummer

## SUSTAINABLE DEVELOPMENT PROGRAM

Reducing emissions of one house is  
equivalent to taking up to 13.5 cars off the road each year

8L/100km  
@ 2.31kg/CO<sub>2</sub>e/L @  
20,000km per year @ 50  
tonnes per House

- Rewards significant improvements in reducing greenhouse gas emissions in new construction projects
- 28% of global emissions caused by operating buildings, 21% caused by constructing new buildings
- Two tier program to tackle upfront emissions caused by construction as well as operating emissions.

### WHAT'S IN IT FOR ME?

- **40% Permit fee reduction** for new houses that meet a low carbon footprint
- **80% Permit fee reduction for new houses** that meet a low carbon footprint and near net zero energy consumption
